High level of performance without compromising your comfort

Our Elemental Poly-reinforced gown (High Performance) provides an affordable solution for procedures where moderate to high levels of fluid are expected. The added reinforcement in the critical zones of the gown offers enhanced protection against strike-through from fluid or blood. Constructed from 48gsm SMMS fabric, it provides high level barrier properties while also offering a high level of breathability to ensure optimal comfort for the wearer. The ergonomic fit with raglan sleeves provides the wearer with added comfort, a greater range of movement and allows for easier donning.
